

San Jose BioCenter Job Board

Job Title: Chemistry Analytics Laboratory Technician

Company: San Jose BioCenter

Pay Rate: Based on experience

Job Location: San Jose BioCenter (101 and Blossom Hill area)

Description:

The San Jose BioCenter is seeking a highly motivated and qualified individual to work as an Analytical Chemistry Consultant and Method Development Specialist. As such you will be required to have experience in one or more of the following analytical methods: HPLC, LC-MS and NMR. Familiarity with troubleshooting and maintenance of analytical instruments is a must.

Responsibilities:

Development of analytical methods, design of HPLC and LC-MS protocols for analysis of various small molecule, protein and peptide samples. Understanding of health and safety regulations is necessary.

About the San Jose BioCenter:

This challenging position involves interfacing with start-up biotech companies at the San Jose BioCenter. As an economic development project, the SJBC was formed by the San Jose State University and the City of San Jose Redevelopment Agency to provide state of the art lab facilities and best in class business practices to emerging companies in the life sciences industry. The goal of this project accelerates the opportunities for life enhancing and life saving solutions to reach the public. The companies within the San Jose BioCenter come from a variety of industries (but are not limited to): Nanotechnology, Pharmaceuticals, Molecular Devices and Biophotonics.

Requirements:

Ph.D. or MS degree preferably in chemistry or related subjects and five years of experience with analytical techniques in an industrial chemical environment or a synthetic laboratory.

How to Apply: Submit a cover letter, resume and the names of three references via email.
